

Minimally Invasive Zirconia Crown for Natural Smile Design

Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: ADS China Dental Lab

Product Specification

- Resistance To Fracture: High
- Strength: High
- Size: Customizable
- Esthetics: Natural
- Application: Dental Restoration
- Ease Of Use: Easy
- Type: Zirconia Crown
- Material: Zirconia
- Highlight: dental layered zirconia crown

Product Description

Product Description:

One of the unique features of this product is that it has a multilayered structure, which allows it to mimic the natural tooth structure, providing an aesthetic and natural-looking restoration. The crown and bridge have a zirconia stain applied on the surface to give it a lifelike appearance, making it difficult to distinguish from natural teeth.

The Dental Zirconia Crown and Bridge is also highly resistant to fracture, which makes it a reliable choice for dental restorations. It is designed to withstand the heavy biting and chewing forces, ensuring a long-lasting and durable restoration. This product is perfect for patients who have a history of teeth grinding or clenching, as it can resist the damage caused by such habits.

The ease of use of the Dental Zirconia Crown and Bridge is one of its most significant advantages. The product is easy to work with, and the dentist can easily customize it to fit the patient's unique dental needs. The crown and bridge can be easily adjusted to fit the patient's bite, ensuring maximum comfort and functionality.

The Dental Zirconia Crown and Bridge is a type of zirconia crown that is widely used in dental restorations. Zirconia crowns are known for their strength and durability, making them an ideal choice for dental restorations. The zirconia stain applied on the surface of the crown and bridge adds to the aesthetic value of the restoration, making it look natural and lifelike.

In conclusion, the Dental Zirconia Crown and Bridge is a top-quality product that provides a multilayered structure for durability and long-lasting use. It is highly resistant to fracture, making it a reliable choice for dental restorations. The product is also easy to use and can be customized to fit the patient's unique dental needs. The zirconia stain applied on the surface of the crown and bridge ensures a natural and lifelike appearance, making it an ideal choice for patients who want to restore the natural look of their teeth.

Product Name: Dental Zirconia Crown And Bridge

Biocompatibility: Excellent

Strength: High

Type: Zirconia Crown

Translucency: High

Durability: Long-lasting

Zirconia stain resistant

Zirconia stain resistant

Zirconia stain resistant

Technical Parameters:

Parameter	Description
Translucency	High
Strength	High
Fit	Precise
Ease Of Use	Easy
Esthetics	Natural
Size	Customizable
Durability	Long-lasting
Layered Structure	Multilayered
Type	Zirconia Crown
Application	Dental Restoration

Applications:

One of the most significant benefits of Dental Zirconia Crown and Bridge is its biocompatibility. Our product is made from biocompatible materials that are safe for use in the mouth, making it an excellent choice for patients with sensitive teeth and gums. The precise fit of our crowns and bridges ensures that patients will not experience any discomfort or irritation after installation.

Another advantage of Dental Zirconia Crown and Bridge is its natural esthetics. Our product has a natural, tooth-like appearance that blends seamlessly with the patient's existing teeth. This makes it an ideal choice for patients who want to improve the appearance of their smile without sacrificing the natural look and feel of their teeth.

Resistance to fracture is another essential attribute of Dental Zirconia Crown and Bridge. Our product has a high resistance to fracture, making it an excellent choice for patients who need a durable, long-lasting restoration. This product's durability ensures that patients can enjoy the benefits of their dental restoration for many years, without the need for frequent replacements.

Finally, Dental Zirconia Crown and Bridge is effortless to use. Our product is designed to be easy to install, making it an ideal choice for dentists who want to save time and effort during the installation process. The zirconia stain used in the manufacturing process ensures that our crowns and bridges have a consistent color, making them easy to match with the patient's existing teeth.

Overall, Dental Zirconia Crown and Bridge is a versatile and high-quality dental restoration product that is perfect for a wide range of dental applications. Its biocompatibility, precise fit, natural esthetics, resistance to fracture, and ease of use make it an excellent choice

for dentists and patients alike.
